

Encino Park/Sienna Basin Drainage Improvements

**Public Works Department
July 16, 2024**

Project Team

Public Works Storm Water Engineering Division

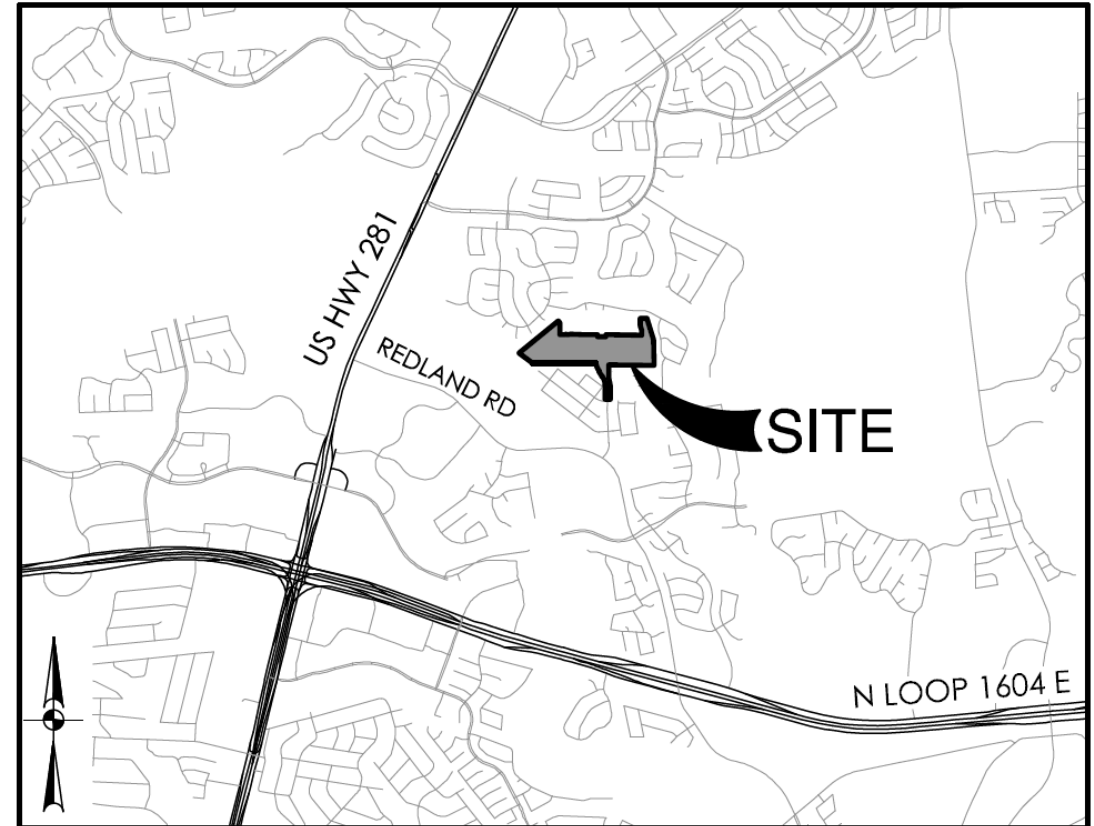

- Richard De La Cruz, P.E.,
Senior Engineer
- Joe Hinojosa
Capital Projects Officer

Design Consultant: Pape-Dawson Engineers

- Jim Welch, P.E., LEED AP
Vice President

Contractor: EZ-Bel

- Grant Jimenez

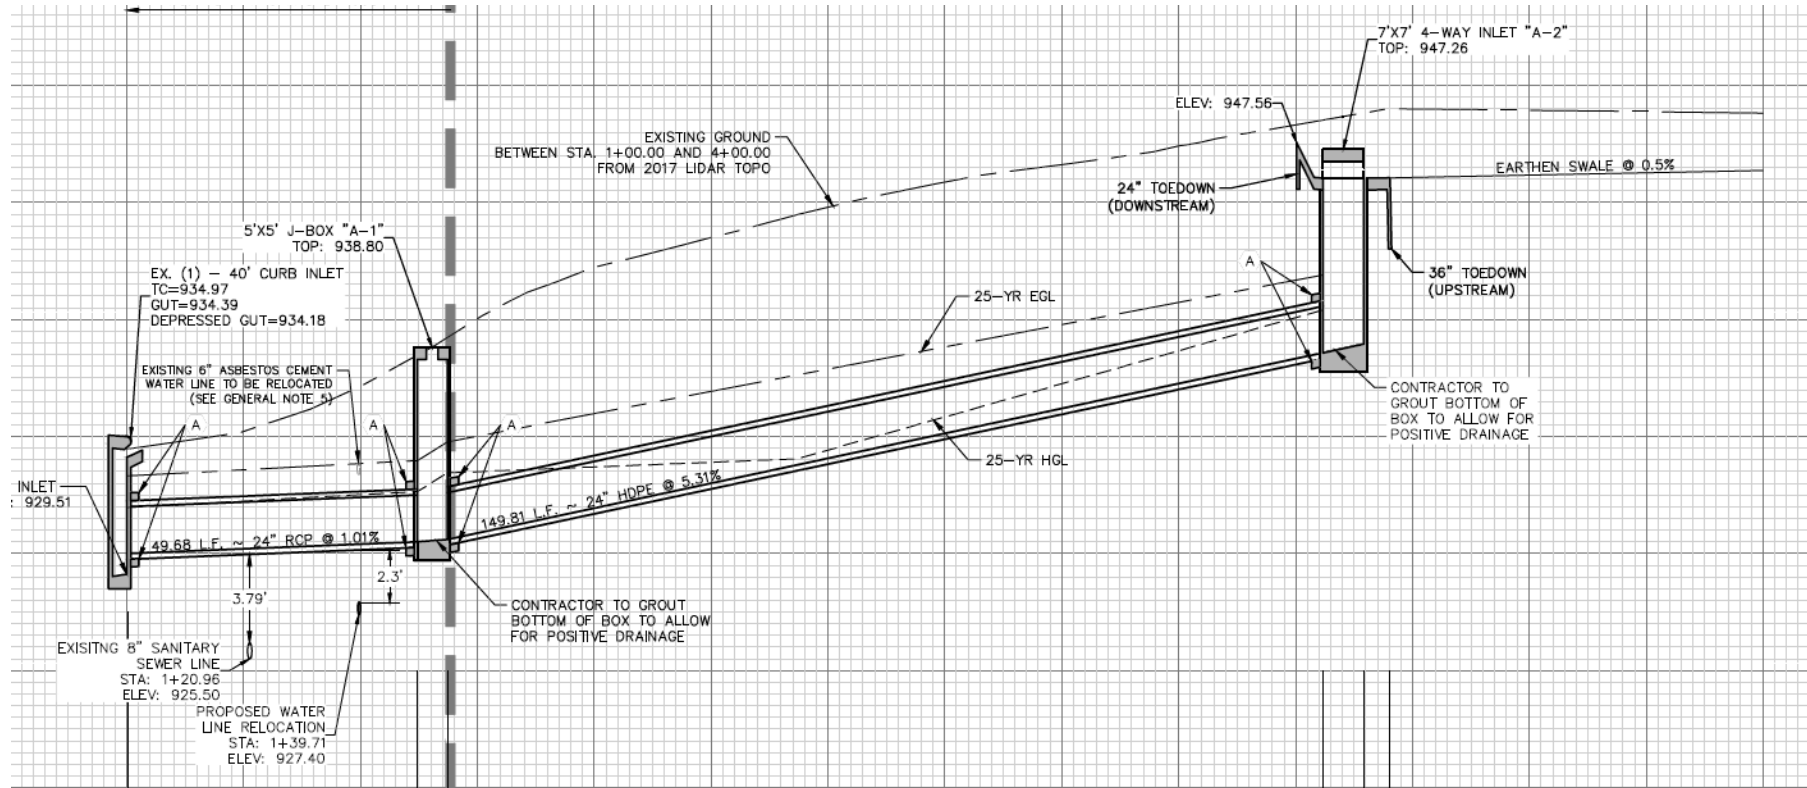

Background

During the May 2021 rain event, storm water overflowed from a nearby channel flooding adjacent properties and causing extended runoff in the street.

Proposed Design

To alleviate this flooding, Public Works proposes to install a swale to redirect runoff to a new underground storm drain.

Proposed Design

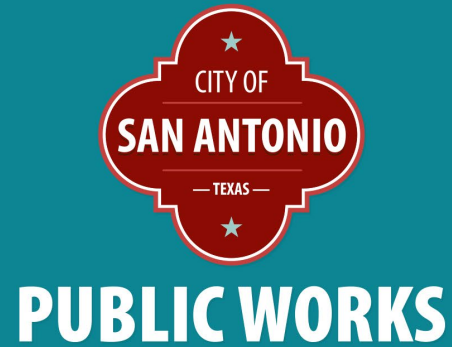

To alleviate this flooding, Public Works proposes to install a swale to redirect runoff to a new underground storm drain.

Typical Questions asked :

- Contractor hours of operation
- Trash pick up
- Emergency vehicle access
- School bus routes
- Access to street and sidewalks during construction
- Mail delivery
- Rain schedule
- Holiday Schedule

Schedule

Encino Park/Sienna Basin Drainage Improvements Project

- Schematic/Design began: 2021
- Design complete: Fall 2023
- Construction start: July / August 2024
- Construction duration: 6 - 8 months, weather permitting
